

Dear,

I am writing to express my strong interest in the PHP Fullstack Developer position at your company. With over 10 years of experience in digital product development, combining front-end design expertise with back-end programming in PHP and Laravel, I bring a well-rounded, user-focused approach to building high-quality web applications.

My professional journey began at B2W Digital, one of Latin America's leading e-commerce companies, where I worked on digital marketing campaigns, UI/UX design, and front-end development. This experience grounded me in the importance of combining performance with visual clarity to meet both user and business needs.

Since 2017, I have been working as a freelance fullstack developer and designer, leading projects from initial concept to deployment. I've designed and built responsive websites and platforms using HTML, CSS, JavaScript, PHP (Laravel), and MySQL. I often integrate design systems, API connections, and user-centric features that enhance both usability and maintainability. My hybrid skill set allows me to handle everything from prototyping and visual design in Figma to implementing complex back-end logic and database architecture.

What sets me apart is my ability to collaborate across disciplines—communicating effectively with designers, developers, and stakeholders alike. I'm passionate about writing clean, scalable code and crafting intuitive interfaces that solve real-world problems.

I'm excited about the opportunity to contribute to a dynamic team and help build reliable, modern web solutions. I am available to start within [your availability] and would welcome the chance to discuss how I can support your company's goals.

Thank you for your time and consideration.

Best regards,
Paulo Júnior
